This is a response to EPA's letter "Required Submission of Information Safety Light Corporation Site Bloomsburg, Pennsylvania" (received April 24, 2006).

1. No information could be found to describe the relationship between U.S. Geological Survey and Safety Light. No business relationship exists at this time.
2. No information could be found.
3. Not applicable.
4. Unknown. Not according to our records.
5. Not applicable.
6. No one identified. All employees of the USGS in 1957 are either retired or deceased.
7. Unknown. To the best of my knowledge, no applicable documents exist other than what I have.
8. Unknown. There are no known living parties with useful information.
9. The documents are no longer available. The referenced AEC license was held by the US Geological Survey back in the 1950's. It is unknown whether the records were destroyed or archived since we have no idea what part of our organization held this license. The NRC website (<http://nrc.ornl.gov>) indicates that license 05-01399-02 was terminated on 6/30/1957. We have requested information from the NRC and are waiting on their response. We have also requested information from our long-standing retirees, but none of them have any knowledge of this license or persons who were involved with it.
 - a. Currently, our documents are retained in accordance with the regulations in 10 CFR.
